DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, drawn to a wear ring for a miter saw, classified in class 83, subclass 471.3.
 - II. Claims 9 and 10, drawn to a sliding fence of a miter saw, classified in class 83, subclass 468.3.
 - III. Claims 13-16, drawn to a blade guard of a miter saw, classified in class 83, subclass 478.
2. Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination I has separate utility such as the wear ring can be used as a bearing in a rotatable surface of a rounded dining table or in a trolley wheel assembly. See MPEP § 806.05(d).
3. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phong H. Nguyen whose telephone number is 571-272-4510. The examiner can normally be reached on Mon-Fri.
